

Fairfield County Dental Club

Continuing Education's Best Kept Secret

FCDC Season

2019 2020

Dear Colleague,

We are pleased to introduce the lineup of Full Day and Evening Seminar Speakers for the **FCDC 2019-2020** season.

- **Michael Sonick, DMD and the Team of Fairfield County Dental Club**

The Fairfield County Dental Club is designated as an Approved PACE Program Provider by the Academy of General Dentistry. The formal continuing education programs of this program provider are accepted by the AGD for Fellowship/Mastership and membership maintenance credit. Approval does not imply acceptance by a state or provincial board of dentistry or AGD endorsement. The current term of approval extends from 10/1/2016 to 9/30/2020. Provider ID# 216393

September 25, 2019 Leah Lochner, BM // Evening Seminar •

"Winning The Insurance Game"

Learning Objectives:

With this program, you will be able to implement systems for your practice and your team on how and when to appeal claim denials, knowing how exactly the insurance works and how to work it to your favor. You will be able to better manage and choose what insurance carrier is right for your practice and your patients.

Proper Coding: End of day sheet / Problem codes and how to get them paid the 1st time / Dental/Medical cross coding

Financial Accountability: Insurance verifications / How and when to work the aging reports / Documentation, Documentation, and more documentation.

The Game: Know your competitor (The Insurance companies) / Know your rules (What rights does the provider have, knowing the in's and out's of your provider contract) / How to win the game (How to handle appeals, peer reviews, etc.)

October 11, 2019 Pascal Magne, DMD // Full Day Seminar

"Posterior Bonded Restorations: Direct and semi-(in) direct biomimetic techniques"

Is the "mechanical retention and resistance form" era coming to an end? Adhesive dentistry and the biomimetic/bio-emulation approach are now gaining significant momentum. In 2013, the United States was among the first countries to sign the Minamata Convention aiming at reducing and possibly eliminating mercury pollution, including a phase-down approach to dental amalgam. Now more than ever, dental professionals have the responsibility to offer and to deliver valid alternative treatment options to their patients. Direct and semi-(in) direct restorative techniques using bonded composite resin and ceramic materials constitute major players as possible alternatives. This presentation will discuss the instruments, materials and innovations that will allow the optimal application of adhesive restorative techniques in your practice.

Objectives: Defining the biomimetic principle through biology, function, mechanics and esthetics / Understanding the correct dentin bonding strategy / Optimizing the use of direct composite...

October 30, 2019 Multiple Case Presentation // Evening Seminar •

"Comprehensive Treatment Planning Seminar"

Dinner will be served followed by a lively two-hour discussion of treatment planning. Five to ten participants will present cases to be treatment planned or show already completed cases. This will be followed by a spirited discussion of the therapeutic alternatives that exist – an excellent way to exchange ideas and to expand your knowledge base. This forum will also serve as a learning crucible for the difficult cases. Please note that you do not have to present cases to participate.

November 20, 2019

John Sconza, DDSS // Evening Seminar •

“Digital Dentistry Technologies”

The program will review recent advances in computer-aided design and manufacturing (CAD/CAM) in implant dentistry and explore the possibilities offered by a fully digital approach, eliminating the need to implant-level impressions while delivering an anatomically precise restoration for Zimmer Biomet Implant Systems. The speaker will also discuss how proper abutment design and emergence can help mitigate long-term problems with implants such as bone loss and infection. Concepts such as machining tolerances, micro-movement/micro-leakage and OEM parts will be addressed. Literature will be presented on how multiple disruptions in the implant restorative site can impact long-term bone, soft-tissue, and ultimately aesthetic results.

Objectives: Alternative restorative options when taking a fully digital approach. / Final Restorative Options for Dental Implants / The benefits of using a fully digital approach.

December 6, 2019

Rick Roblee, DDS // Full Day Seminar

“Interdisciplinary Management of Esthetic and Restorative Dilemmas”

Some of the most challenging esthetic and restorative dilemmas are those that fall into a gray zone between traditional therapies. The complexities of diagnosing these problems, coupled with the lack of optimal treatment options, often lead to inappropriate treatment and disappointing compromises. This presentation will focus on an interdisciplinary approach to diagnosing the fundamental components of these complex problems and managing them by combining traditional therapies with new treatment options to ideally address the underlying issues and more predictably achieve success. These new options include surgically facilitated orthodontic therapy (SFOT) utilizing corticotomies and single or multiple-tooth osteotomies.

Objectives: Solutions to esthetic dilemmas often fall into a “Gray Zone” between the different disciplines. / An interdisciplinary approach is needed to properly diagnose and treatment plan these problems / Recent advances in orthodontics can assist the inter ...

“Comprehensive Treatment Planning Seminar”

Dinner will be served followed by a lively two-hour discussion of treatment planning. Five to ten participants will present cases to be treatment planned or show already completed cases. This will be followed by a spirited discussion of the therapeutic alternatives that exist – an excellent way to exchange ideas and to expand your knowledge base. This forum will also serve as a learning crucible for the difficult cases. Please note that you do not have to present cases to participate.

February 7, 2020

Robert Levine, DDS // Full Day Seminar

“MMPPI: The scientific way to keep your patients teeth and build your periodontal practice” & 10 Keys of Esthetic Implant Therapy”

MMPPI - LANAP. The science behind MMPPI (Miller-McEntire Periodontal Prognosis Index) will provide the knowledge that you need to motivate patients to accept treatment and keep their natural teeth.

Objectives: Describe the use and benefits of the MMPPI in clinical practice as “physicians of the mouth” / Recognize how the use of the MMPPI translates clinical outcomes (LANAP therapy) into patient “value” (case acceptance) .

10 KEYS: This course will address the close interaction of the implant surgeon with the restorative dentist and dental laboratory in achieving optimal esthetic outcomes and reduced patient morbidity. Using the “10 Keys” approach, Dr. Levine will share his 30+ years in full time periodontal practice with initial data of a clinical and CBCT study.

March 11, 2020

Kim McCleskey, CPBC // Evening Seminar •

“The Business of Dentistry”

Our practice financial accountability training will give you the tools and processes needed to facilitate a monthly financial meeting showing that all three software systems reconcile (your practice management software, QuickBooks and the bank system). This system will ensure your patient accounts are correct and that all receivables are accounted for. It's also our best tool to prevent or catch embezzlement. In addition, we will create a road map of overhead expenditures and projected income, which shows you the exact costs to operate your practice each month, and, of course, your projected cash flow.

Course Objectives:

Front desk financial accountability checklist. / Checklist of items needed to facilitate monthly financial meeting, including a managers monthly accountability worksheet. Overview of reading your P & L (Profit and Loss) / Embezzlement-proofing your practice.

April 17, 2020

Jeff Brucia, DDS // Full Day Seminar

“Restorative Materials & Techniques Simplified”

The numerous choices in restorative materials has confused the clinician as to what is best indicated in a given situation. The continuous evolution in adhesive materials and techniques combined with the ever-increasing demands for predictable and long lasting aesthetic restorations demands continuous learning in the areas of material science and restorative technique.

This lecture course provides an overview of the restorative options you should be considering today as well as a comprehensive discussion of the ever-changing world of dental adhesives. Dr. Brucia has lectured internationally on this subject and will guide you through the collection of materials and techniques available today for providing both direct and indirect restorations that will meet your patients expectations for quality dental care. This is a must see program for all wet fingered restorative dentist.

CE Credits : 40

Format : **Friday Full Day Seminars:** 8:00 AM to 3:30 PM - Breakfast & Lunch provided.
Wednesday Evening Seminars: 6:00 PM to 9:00 PM, Dinner & Dessert provided.

Location : **Conference Center**
Fairfield County Implants and Periodontics
1047 Old Post Road, Fairfield, CT 06824

- Benefits :**
- World-Class Education in Fairfield
 - Continuing Education Credits
 - Increased Interdisciplinary Interaction
 - Catered Gourmet Meals
 - Treatment Planning Sessions
 - Networking Opportunities
 - Direct Access to Dental Specialists
 - One-On-One Mentorship with World Renowned Dental Leaders

“Instruction ends in the school-room,
but education ends only with life.”
