24 FCDC SEASON 25

Continuing education's best kept secret

Dear Colleague,

We are pleased to introduce the lineup of Full Day and Evening Seminar Speakers for the FCDC 2024-2025 season. We strongly recommend that you reserve your membership spot now. We are anticipating a multitude of interest, and you will not want to miss this opportunity!

–Michael Sonick, DMD and the Team of Fairfield County Dental Club.

SEPT
25
2024

Evening Seminar ◉
**Multiple Case Presentation
Comprehensive Treatment Planning Seminar**

Dinner will be served followed by a lively two-hour discussion of treatment planning. Five to ten participants will present cases to be treatment planned or show already completed cases. This will be followed by a spirited discussion of the therapeutic alternatives that exist – an excellent way to exchange ideas and expand your knowledge base. This forum will also serve as a learning crucible for difficult cases.

Note that you do not have to present cases to participate. If you want to share a case, please email us your presentation to: fcdc@sonickdmd.com

OCT
11
2024

Full Day Seminar
**Francesco Amato, DDS
Single Tooth Implant Rehabilitation from Past to
Future: – A minimally invasive approach to achieve an ideal esthetic
result in the maxillary anterior area”**

This lecture will cover single-tooth implant rehabilitation in the anterior maxillary area, including topics such as post-extraction remodeling, staged approach/socket preservation, immediate placement in different socket types, guided tissue preservation, orthodontic implant site development, unconventional tooth replacement techniques, and hard and soft tissue management. The lecture will also discuss treatment options, pros and cons, type of graft, implant selection and position, provisionalization, and an innovative technique for fabricating temporary restorations.

OCT
22
2024

Evening Seminar ◉
**Hunter Satterfield, CPA
The New Economy and Its Impact on
Your Financial Life**

The dental landscape is undergoing a significant transformation, marked by the rise of ever-changing economic factors affecting your practice and investments. This profound shift impacts how you must navigate your business and personal financial plan. Where does the data say the industry is heading? And how must you also adjust your behavior? Chief Investment Officer Hunter Satterfield will discuss the shifting global economy, the impact of DSOs and private equity on the industry and how attendees can prepare their portfolios and practice for what lies ahead, using real case studies, performance metrics, and real-life experience gained from working alongside practice owners.

**NOV

Evening Seminar

Paul Vigario, CEO

Thinking Outside the Box. Go From Ordinary to

Extraordinary: Redefine what's Possible with Dentistry and for your Life

This course will show you how to do just that. Connect your practice to your vision in a more automated way that prioritizes what's important for you and your life while growing your practice. The reality is most healthcare professionals focus on fitting themselves into traditional business models because they are unaware of what is possible in 2024. In this lecture, founder & CEO of SurfCT, Mr. Paul Vigario shifts your perspective, and shows you how to get the most out of being a doctor so your systems and practice are designed with your lifestyle and vision firmly placed in the driver's seat.

Full Day Seminar

Henriette Lerner PhD, FDSRCS

Unlocking The Power of Digital Dentistry:

Parameter Of Accuracy And Aesthetics

The evolution of digital technology has fundamentally altered the landscape of dentistry, particularly in the realm of full arch restorations, where exactitude and visual appeal hold paramount significance. The lecture provides an overview of the precision and esthetic considerations within the framework of digital workflow for full arch restorations, following the path: **SCAN / PLAN / MAKE / DONE**. Various guided surgery technologies will be described.

**FEB
7
2025**

Full Day Seminar

Ben Miraglia, DDS

The Critical Role of The Dental Team to Identify Early Childhood Malocclusion

This lecture serves as a call to action for all dental professionals dedicated to preventing sleep-disordered breathing, rather than waiting to treat the devastating effects it imposes, such as ADHD, bedwetting, asthma, cardiovascular disease, lower IQ, depression, and other maladies. With an estimated 22 million Americans suffering from obstructive sleep apnea (OSA) and 80% of moderate and severe OSA cases going undiagnosed, the dental team is being called upon to help reverse this crisis. By understanding the root cause of OSA, malocclusion, and soft-tissue dysfunction, hygienists and dentists can take proactive steps by applying lifesaving protocols to prevent OSA in patients of all ages.

2025**

Evening Seminar ◉
Gregory A. Toback, DMD
**Diagnosis, Treatment and Prevention of
Peri-implantitis**

The modern dentition of our patient pool involves a mix of natural teeth and dental implants for many of our patients. Although the pathogenesis of dental diseases of natural teeth has been researched for generations, the ailing implant presents a rather new challenge for the clinician and is not clearly understood. The next generation of clinicians will be faced with a population of patients requiring expert care of their titanium dentition. Dr. Toback will review the common understanding of ailing implants. He will specifically emphasize early detection of peri-implant disease, and explore proper diagnosis, etiologies, and available treatment options with a focus on evidence based approaches.

**APR
4
2025**

Full Day Seminar
Lee Ann Brady, DMD
Today's Top Clinical Tips

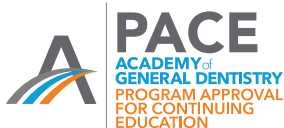

Dentistry is evolving at a rapid pace, and success and efficiency in the field require keeping up with the latest trends and clinical insights. In an upcoming program, Dr. Brady will be sharing top clinical tips and techniques, including both time-tested approaches and cutting-edge methods involving new materials. The tips will cover various areas such as prevention, posterior composites, and indirect all ceramics. The learning objectives include caries and perio prevention, posterior composite efficiency and effectiveness, successful bonding and cementation, and improved posterior all-ceramic restorations.
